NRM Today Offers Scholarship for 2022

Natural Resources Management Today, a digital newsletter to debut in August 2021, offers a \$2,000 scholarship to students enrolled in 2022 in undergraduate and master's in natural resources degree programs accredited by these organizations:

- The [Canadian Forestry Accreditation Board](#) (forestry)
- The [North American Wildlife Technology Association](#) (wildlife and fisheries technology programs)
- The [Society of American Foresters](#) (forestry, forest technology, urban forestry, and natural resources and ecosystem management)
- The [Society for Range Management](#) (range management)

Qualifying undergraduate degree programs include accredited associate's (and similar two- and three-year programs) and bachelor's degree programs in the US, Canada, and Mexico. Students in other programs are not eligible.

Applicants must have earned a cumulative 3.0 grade point average in all of their college/university courses and provide copies of all college/university transcripts.

To apply, complete and submit the [application form](#) by November 30, 2021. The award recipient will be notified in December 2021. The recipient's scholarship application essay will be published in *NRM Today* in early 2022.

The 2022 scholarship recipient will be selected by a committee of NRM professionals and stakeholders.

The scholarship is made possible thanks to a generous donation from the Mt. Hood Stewardship Council, a nonprofit organization dedicated to conserving natural resources on the Mount Hood National Forest and surrounding federal, state, tribal, and private lands in Oregon.

NRM Today welcomes additional contributions to increase the funding amount and/or number of scholarships in the future. For more information, contact *NRM Today* editor and publisher Steve Wilent at Steve@nrmtoday.com.

NRM Today is designed to serve natural resources managers in North America. NRM professionals have much in common: They often work collaboratively with practitioners from different disciplines, use similar technologies, and face many of the same challenges. The mission of *NRM Today* is to help NRM professionals in the United States, Canada, and Mexico work smarter and work better together, from the field up.
