Job Description

The employees in these positions will conduct stream habitat, juvenile snorkel, and/or electroshocking surveys in Oregon streams. Duties include:

* Hike into and along streams daily.
* Describe channel morphology and instream habitat characteristics.
* Assess distribution and abundance of juvenile fish.
* Keep accurate and clear data records.
* Work in hot, cold, rainy weather and over rough terrain.
* Occasional camping or backpacking in remote areas.
* Work on a two-person crew on streams within a specific geographic area.
* Communicate with the public to gain access to private land and to explain monitoring activities.

These positions require a flexible work schedule that varies in the number of hours worked on a daily basis, but not necessarily each day, or a work schedule in which the starting and stopping times vary on a daily basis, but not necessarily each day including most weekends and some night work. These positions may be physically demanding.

Please contact Human Resources at 503-947-6051 with any questions.
This position requires a Criminal History Background Check and Driving record check.
