OUTDOOR HEAT DATA COLLECTION

STUDENT VOLUNTEERS NEEDED!

Interested in joining us?

Volunteers are needed to assist in collecting heat data at outdoor Tucson streetcar stops during July 2021. Data collection will focus on wet bulb globe temperature (WBGT) and surface measurements in the sun and shade for different materials. Training will be provided in the first 30 minutes of each shift. Volunteers will be compensated for their effort with a $50 gift card. This opportunity is open to any student at the UofA but is particularly pertinent to those studying heat/climate health in both community and occupational settings.

For more information, please email Ida Sami, Arid Land Resource Sciences Ph.D. Candidate, sami@email.arizona.edu.

VOLUNTEERS REQUIREMENTS INCLUDE:

- Available for 6 hr shift during July 2021.
- Able to collect data outdoors on warm above 100 degrees (with breaks out of the sun regularly)
- Have own transportation to and from streetcar stops.
